**STATEMENT BY ATTORNEY IN SUPPORT OF PETITION TO MAKE
SPECIAL BECAUSE OF ACTUAL INFRINGEMENT**

(37 C.F.R. §1.102 and M.P.E.P. §708.02)

I, Donna L. Angotti, special counsel of Schulte Roth & Zabel LLP, located at 919 Third Avenue, New York, New York 10022, having registration number 32,679 and telephone number (212) 756-2000, am the attorney for all Applicants in the above referenced Patent Application and make the following statements:

1. There is an infringing product actually on the market. The infringing product is a Caltarian™ technology platform of Ripstech, Inc., located at 2800 Eisenhower Ave, Alexandria, VA 22314. The Caltarian™ technology platform includes Security Operations Centers ("SOC") which process intrusion events detected on a client's network. Caltarian accesses the client's network through Virtual Private Network (VPN) connections. Firewalls, intrusion detection systems (IDSs), VPNs, and other security applications detect intrusions and log intrusion

information to the SOC over a secure connection. The SOC monitors all intrusion detection devices on the client's network.

2. I have made a rigid comparison of the alleged infringing product with the claims of this application, as amended by the enclosed Preliminary Amendment.

3. In my opinion, at least Claims 13 and 17, added by the attached Preliminary Amendment, are unquestionably infringed. Claims 13 and 17 read as follows:

13. A security system for a computer connected to a computer network comprising:
at least one detection means associated with said computer, said detection means configured to detect an attack on said computer;
a master security system located outside said computer network;
and
a secure link between said detection means and said master security system enabling data communication therebetween;
wherein
said master security system monitors said detection means through said secure link and registers information pertaining to attacks detected by said detection means.

17. A network security system for a target network of computers comprising:
at least one detection means associated with said target network, said detection means configured to detect an attack on said network;
a master security system located outside said network; and
a secure link between said detection means and said master security system enabling data communication therebetween;
wherein
said master security system monitors said detection means through said secure link and registers information pertaining to attacks detected by said detection means.

09/770,525
881075/3

4. I have caused to be made a careful and thorough search of the prior art. All prior art references uncovered in the search are disclosed in the attached Information Disclosure Statement (PTO/SB/08). Copies of the references are enclosed.

5. I believe all the claims in this application which are on file resulting from the attached Preliminary Amendment are allowable.

Respectfully submitted,

Schulte Roth & Zabel LLP
